DETAILED ACTION

Claims 1-14 and 17 are pending. *The continuing data should be inserted in the specification.*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 6, 8, 10, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 4 when defining *Y* have the variable and the term 'epoxide'.

Only one is needed. Please correct.

Claims 6 and 8 do not end in a period.

Claims 10 and 11 (at line 2 in both claims) recite R3 at the C9 position when it should be R4 at that position. Please correct.

Claims 1-14, and 17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The invention appears to employ a novel marine bacterium. Since the marine bacterium is essential to the claimed invention, it must be obtainable by a

repeatable method set forth in the specification or otherwise be readily available to the public. The enablement requirement of 35 U.S.C. § 112 may be satisfied by deposit of the following marine bacterium MK-PNG-276A. The specification does not disclose a repeatable process to obtain the microorganism and it is not apparent if the marine bacterium is readily available to the public. Accordingly, it is deemed that a deposit of the microorganism should have been made in accordance with 37 C.F.R. § 1.801-1.809.

If the deposit was made under the terms of the Budapest Treaty, then an affidavit or declaration by the applicant, or a statement by an attorney of record over his/her signature and registration number, stating that the specific microorganism has been deposited under the Budapest Treaty and that the strain will be irrevocably and without restriction or condition released to the public upon the issuance of the patent, would satisfy the deposit requirement made herein.

If the deposit has not been made under the Budapest Treaty, then in order to certify that the deposit meets the criteria set forth in 37 C.F.R. § 1.801-1.809, the applicant may provide assurance or compliance by an affidavit or declaration, or by a statement by an attorney of record over his/her signature and registration number, showing that:

- (1) during the pendency of this application, access to the invention will be afforded to the Commissioner upon request;
- (2) all restriction upon availability to the public will be irrevocably removed upon granting of the patent;
- (3) the deposit will be maintained in a public repository for a period of 30 years or 5 years after the last request or for the effective life of the patent, whichever is longer; and
- (4) the deposit will be replaced if it should ever become inviable.
